To Whom It May Concern:

On October 15th – 17th of this year, the Wyoming Counseling Association held its annual fall conference at Casper College. It was our great privilege to have Dr. Royce Fitts as a half day presenter on “Projective Dreamwork” for our association members.

Speaking to counselors from different arenas, including the areas of private practice, community, addictions, school K-12, and college counseling, Dr. Fitts provided a wonderfully well-organized and educational session. His leadership style was professional and exciting. He kept the presentation on track and moving, while still involving the audience. In sharing a repetitive dream I had as an eight year old, and with help from the audience, I learned about my struggle for independence as a child. Because of Projective Dreamwork, my 40 years of wondering why that dream was so powerful in my life, was resolved! I witnessed other dreamers share and experience their “aha’s” as well!

Dr. Fitts was recommended to us by a college psychology instructor who heard him speak, and I gladly carry that recommendation forward to others. His expertise with dreamwork touches our human subconscious, and brings individual as well as community issues to the surface. I highly recommend Dr. Fitts as an outstanding conference presenter.

Sincerely,

Becky Gurtler
President
Wyoming Counseling Association
